Fast Video Downloader Free Download

Fast Video Downloader is a handy piece of software that can help you overcome such problems. It allows you to download your favorite videos from popular hosting websites, such as Youtube, Bing, Vimeo, DailyMotion, Metacafe, Facebook, Worldfloat, Veoh, Break, CollegeHumor, EHow or Imdb. Reliable and fast tool for downloading videos The application provides you with a quick and efficient way of downloading videos from online hosting websites, thus helping you overcome the lack of a valid download link. You can process multiple links at once and download each video they lead to. Aside

from that, the program can load videos from playlist links, allowing you to quickly select which videos will be downloaded and which ignored. Sturdy utility for video download Fast Video Downloader helps you quickly find and download your favorite video streams from within the application. On top of that, you can quickly populate your download list with links, as the program automatically retrieves copied content directly from your clipboard. This means you do not have to keep copying and pasting every link, but systematically copy each one as you keep browsing for other videos. Aside from that, the application keeps track of every downloaded video, allowing you to access this log in case you forgot on

which website you saw them. Average
User Rating: 4.4 PunchBooth

PunchBooth is an easy-to-use program that makes it a snap to add subtitles to your DVDs and other videos.

PunchBooth will automatically scan your video for subtitles and generates a.srt file for them that you can then add to your files. You can even convert your.srt files to other formats. Mplayer Homepage Mplayer is a full-featured player for playing MPEG/VOB video streams and DVDs using free and open source software. It was the fastest and most feature-complete player around in the mid-to-late 1990s. In August 2005 version 0.14 was released featuring the xine engine for DVD playback. In April 2006 the project's engineering team

announced its intent to retire the Mplayer code and its website. MPlayer was a relatively popular player, but since the mid-2000s other commercial players (such as VLC) have surpassed it in popularity as most users switched to those players. ZRanger ZRanger gives you access to the data on your server using any web browser. You can search for files, navigate folders, and get information about
