- Program not made by professional developers

White Paper Preview for ForSight

WONDERFUL FEATURES:

Sustainable, Patient, Specialist and Employee Retention At Eye Center our management software is designed to be user-friendly for our ophthalmologists. Our application is tailored to the needs of our practitioners and patients alike. With our eye clinic management software, you will spend less time on paper, save time, and create a less stressful environment for you and your staff. And with clear, simple user interfaces, keeping your practice efficient, organized, and successful is a cinch. You've heard us say it before

– we really do know that eye care is a specialty of its own. Our software is designed from the ground up to provide you with a fully integrated, all-in-one solution for your practice. It is designed to make the daily practice of ophthalmology easy, so you can spend more time on your patients and less time on paperwork. The application has been developed with the goal of creating an intuitive software application for eye care professionals. Track VISIT ONLINE Start, manage and track your patients on the go with a personalized view of their history, results and schedules. No more paper

files to manually organize, no more scrolling through endless appointments, no more miss-date. No more headaches. With ForSight you can: Organize Visits Manage Schedules View Real Time Visits Quickly Access Schedule Create patients in a few simple steps Surgical Scheduling Easily schedule multiple patients with one click, all without paper. Organize your patient's personal information and keep them logged in while they're in your office. Create patients in a few simple steps View REAL TIME Visits See when patients have arrived and when

they're scheduled to arrive to your clinic or hospital. Quickly Access Schedule Need to 1d6a3396d6

Doctors and Nurses are struggling to manage their time efficiently in the clinic. On top of that, patients' files and medical history are not properly managed. The simple solution is to install the FORESIGHT eye clinic management software. The app automatically creates a patient database and stores all medical history. You can create as many patient record as you want. The app records all the patient visits and invoices. If you want to monitor the time your patients spent in the clinic,

the app has a timer feature. The most complicated and time-consuming part is entering patient records. You can access the patient list via a neat interface. The only other software you need is Microsoft Office Suite and a personal computer to run FORESIGHT eye clinic management software. KEY FEATURES: • Database creation • Patient/visit management • Billing management • Patient/visit notes • Patient information • Timer • Use timers • Word processor • Paint • Graphical reports • Line chart • Table/Excel • Upload doc files • Offline access •

Print • Search • Import/export •
Patient history • Easy to use • User
interface • Access to patient list via
interface • Prevent other software
from starting • Customize title •
Automatically import EKG data •
Email all patient database • Track on
line or by patient • Track on visit or
by patient • Track on operation •
Track on clinic • Track on site •
Track on office • Track on server •
Easily customizable • Basic/advanced

The Critical Care Unit needs a very
advanced management system with
many features. For this application
we thought it would be best to build

one from the ground up, so we worked very closely with a professional development team. Currently this application is quite robust, has an advanced UI, so you can do almost anything in it. It offers the following features: - Newsletters - Patient Notes (you can store your notes in plain text or in excel format) - Patient Record (you can track and manage every visit, problem and operation of a patient, you can track it by problem, by operation or by visit) - Import and Export of patient notes (you can import notes from an older version of this application or from

any text file) - Patient history (you can import patient's EKG or other data like eye examination, lung examination)

What's New in the?

This eye clinic management software assists you in organizing the patient visit, scheduling appointments, tracking your patient's eye care history, and all other essential tasks related to managing your clinic. You can customize your clinic any way you wish. You can create your own patient database, set your own color

scheme, upload your own photos, add your logo and fonts, and more!

Features: 1. Get a detailed list of all the patients who visit your clinic 2.

Split-screen view to create a private note pad for each patient 3.

Interactive reports and charts to create a useful chart that will help you identify the patient's disease and

disease progression. 4. Patient list can be sorted by 'Visit Date', 'Prayer

Time', 'Report Date', 'Age' and 'Sex'

5. Database and email recordation are highly customizable. You can sort and filter the database 6. Report views 7.

Smart calendar view that helps you

schedule your patients 8. Clock widget available, keep you posted at your eye clinic 9. Type 'B' to add a B-type question or answer 10. Double-click anywhere to start a text/note 11. Schedule your patients' appointments on your Calendar 12. You can schedule a 'recurring' appointment, it will repeat a time and date without changing the date every time the patient visits the clinic 13. You can specify the reminder time and date and the patient will receive it on his/her device 14. Easy to use 15. The patient database will keep track of your patients. Their personal

information such as address, height, weight, blood pressure, onset of the disease and most importantly their medical history will be available to you!

16. Medical history and notes can be added to the patient records.
17. You can add the procedure code for each procedure done to help identify the procedure in the report
18. Optimized for both desktop and tablet use.
19. Easy to use, you will have no problem working with this eye clinic management software.
20. No internet required, only require an available Wi-Fi connection.
21. Easy to configure, Just 30 minutes to get

your eye clinic up and running. 22.
