We will redirect you to an external website (like ')

### What's New in the Greenland (PPTP)?

Your connection to the Internet is no longer safe. You might use a no cost VPN service to connect to the Internet in no time. VPN is a security software that encrypts the data you send and receive. With this application, you can be safe and secure while connected to the Internet. Now you can bypass the web filters of certain Internet Service Providers. How to use: \* To use this no cost VPN service, you need to run a router on your computer and connect it to the Internet through your home broadband Internet connection. \*After you are connected to your broadband Internet connection, you should launch the VPN client in your router and follow the instructions to configure the router. To configure your Internet connection, you need: \* A router that supports firewall \* A broadband Internet connection with gateway If you need to update the VPN client, please reboot the router. \*PPTP (Point to Point Tunneling Protocol): PPTP is a connection-oriented protocol developed by Microsoft. It is used to establish a secure virtual private network connection. This software works with Windows 2000, XP and Vista. \*Pcfxp-gpd.exe: This is a client application that allows you to connect to any IPV6 host on the Internet. pcfxp-gpd.exe has a similar function with MS Windows Firewall. This application is a simple executable file that can be used as a no cost VPN client. \*ActiveSync: ActiveSync is a client which is used to communicate with a Microsoft Exchange server. This application allows you to connect to your ISP-provided Exchange server, from your computer with a broadband Internet connection. Requirements: \* You need to have a router that supports firewall \* Router must be connected to the Internet through a broadband Internet connection. \* You can browse the Internet with a broadband Internet connection while using this application. \* This program can be used as a no cost VPN client when you are connected to the Internet through a broadband Internet connection. \* The program uses PPTP in order to connect to the Internet. Overview: Greenland is not very difficult to use. Greenland is an Excel 2007 Spreadsheet with a list of usernames and passwords. Greenland works with Windows 2000, XP and Vista. It allows you to bypass web filter and bypass the Internet censoring. Main features of Greenland: \* Create a new username and password for a new Internet account. \* Select the
