Why is the output from the program below giving me the character codes (i.e., 0x00ad, 0x00b0, etc.) instead of the actual characters? Here's the code, if it helps: public static void main(String[] args) { int n = 0; char[] c = new char[?]; for(char i = 32; i Clash of Clans Clans On Same Networking Join CBM Realtime Clash of Clans Clans On Same Networking Join CBM Realtime Clash of Clans Open Beta is a topic that's been around for decades. Website owners have long been attempting to keep their visitors away from other games not affiliated with their websites. The game uses various strategies to keep visitors from finding similar games. The big names in the gaming industry are all working hard to keep Clash of Clans players off the lookout for Clans on other websites. However, Clash of Clans players don't really care. They're keen on competing with other players of Clash of Clans. The goal is to win, and they're more than happy to use tools to do so. 0cc13bf012
